The interview precedes the Scover concert, where Giovanni Falzone re-elaborates in his own way and in a jazz / rock key a special type of Italian songs, those of denunciation and protest of the past. The reworking is both musical and in the lyrics and they tell of a past that in some respects still terribly resembles the present. Dalla Scala a Broadway

Curated by Muse Solidali

A passionate journey from La Scala Theatre in Milan to the legendary Broadway across the ocean. A fun and friendly 'challenge' between musical genres, between classical and modern singing. Singers, actors and dancers lead the spectator through the velvets of opera and the modernity of the musical, not forgetting the world of cinema with its immortal melodies. Famous arias from the opera tradition alternate with the sounds of the musical, creating a fil rouge between the refined atmospheres of La Scala in Milan (one of the most prestigious temples of opera in the world) and the glittering lights of Broadway theatres. And there will be no lack of quotations, memories, stories, dreams and visions of the cinematographic tradition that, together with music and art, has made the history of our country great.

Germi al Castello

Curated by Associazione Germi

Germi is a reality born from the passion and the need to create a place that gives space to culture at 360 degrees, a laboratory that wants to create connections and visions capable of uniting different worlds. The programme of Germi al Castello will be the natural extension of the work done in the first years of activity on the stage of our library. An alternation of musical, literary and popular events (science, literature and various arts), often contaminated with each other as is our stylistic signature. A schizophrenic programme without barriers of genre or artistic discipline.
